

The new standard in
central vacuum systems

Discover the clean power of efficiency, saving and profit.

ERGOX

Our standard

In the current car wash sector, vacuuming and car wellness facilities have become the norm. Ergox offers a complete solution that exceeds this standard. With our years of experience in central vacuum systems, we have elevated the vacuuming experience in car washes to a higher level, with professional performance and minimal costs and disruptions.

Ergox takes away all concerns, not only during the planning and construction of the system but throughout its entire lifespan.

We set a new benchmark for car washes striving for outstanding customer satisfaction, efficiency, energy savings, and profitability.

you are.

All benefits and facts

Entrepreneur

Reliability guaranteed

Ergox systems always deliver top performance, even under high pressure.

Revenue boosting

Using an Ergox system results in increased revenue.

Energy efficiency

Ergox systems consume no energy when not in use, which is logical but unique with Ergox.

Global effectiveness

Equipped car wash systems clean over 25,000,000 cars worldwide annually.

Flexibility

Ergox systems are fully customizable to any situation, preference, or layout.

Ease of maintenance

No hassle with dirty filters. Filters are automatically cleaned, minimal maintenance required.

Full control

Complete (remote) control for maximum efficiency.

System management

- Energy management
- Turbine balancing system
- Vacuum hose and pipe "flow control"
- Automatic pipe cleaning
- Remote control
- Data usable for statistics

End user

Excellent experience

The experience with an Ergox system always exceeds the user's expectations.

Optimal suction power

Always guaranteed powerful suction.

Quick results

Very fast and clean results.

Environment

Energy saving

Ergox continually develops and improves technologies to save energy.

Sustainability

Ergox vacuum systems are reliable, long-lasting, and almost entirely recyclable.

Future-proof

Our Ergox-systems are future-ready, with the ability to add or upgrade new technologies, reducing the need for replacements.

"Anything is possible" approach!

Discover the limitless possibilities with our innovative Ergox central vacuum systems! Whether it's for a car wash or car wellness facility, we offer a wide range of solutions perfectly tailored to every budget and specific need.

Installation examples

Standard

Stand-alone pillar system for piping support. Ideal when no roof or wall is available. It's a cost-effective modern solution for independent systems.

The system offers the possibility to add or integrate different options, such as carpet clamps, parapet, lighting, air pressure guns, waste bins, payment systems.

Curved

This pipe support system provides support for pipes and features a trendy and modern design, with the option to integrate sunroofs. The use of sunroofs is recommended in combination with curved pillars, which is a striking feature of modern car washes. These sunroofs are made of sturdy yet lightweight material that blocks up to 70% of the sunlight.

The system offers the possibility to add or integrate different options, such as carpet clamps, parapet, lighting, air pressure guns, waste bins, payment systems.

T-form

Stand-alone pillar system for piping support. Ideal when cars can be parked on both sides of the row of pillars.

The system offers the possibility to add or integrate different options, such as carpet clamps, parapet, lighting, air pressure guns, waste bins, payment systems.

Limitless possibilities and combinations

Multibox

All-in-one solution combining waste bin, vacuum nozzle holder, air gun holder and carpet clamp in one modern unit. Additionally, customization to your style is possible, with the option to choose from various RAL colors and to add your logo.

This example demonstrates how the indoor pillar system is combined with suspension support system, allowing the pipes to be mounted at a desired height.

Parapet

Our stainless steel (SS) balustrade serves as the perfect base for mounting the vacuum nozzle holders with sensors.

The wiring of the sensors can be discreetly and safely concealed. This system also makes it easy to install other accessories, such as carpet clamps, waste bins or air pressure gun holders.

Universal pillar

Discover our universal stand-alone pillar, perfect for mounting various ERGOX car wash accessories. This compact solution provides space for vacuum nozzle holders, air gun holders, waste bins, carpet clamps and tire inflators. Delivered as standard, ready to install, it offers convenience and efficiency for your car wash installation.

This system significantly increases freedom of movement for the customer. It allows to create a walkway or sidewalk where mat brushing machines can be placed, giving customers more space to move around.

Wide selection of accessories

Automatic tire inflator

Our tire inflator makes tire pressure monitoring simple and reliable, with a sturdy metal housing and convenient integrated display.

Payment systems

Discover our advanced payment systems: choose between payment per spot with contactless, coin, or token options in our standalone pillar systems, or opt for a central payment terminal with contactless payment, barcode scanner, and coin acceptor for maximum user-friendliness.

Carpet holder

A sturdy and ergonomic clamp for mats, designed for effortless vacuuming of car floor mats.

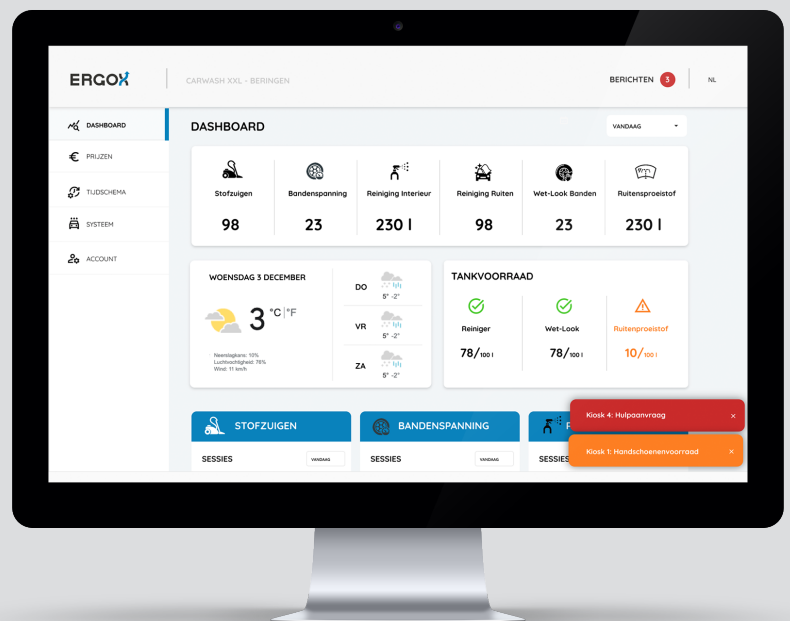

Carpet brushing machine

Quick and effortless dry cleaning and brushing of car mats, thanks to powerful suction connected to the central vacuum system.

Full control

All system parameters are monitored and stored via the touchscreen display, including power management, suction power, working hours and payments, with the possibility of remote control via the ERGOX dashboard.

Our boundless solutions

Thanks to our global network of distributors, our systems can be installed in over 40 countries. Even when complete system is just being delivered, local installers can easily get started thanks to our detailed drawings, installation manuals, and online support if needed.
